

❖ Get Started With Affiliate Marketing

- Affiliate marketing is basically the process of earning a commission by promoting somebody else's product.
- There are two main ways most people do affiliate marketing:
- **Information products.** You promote products like ebook, membership sites, video series, etc. This type of affiliate marketing can earn you up to 50% or more in commission, has relatively low barriers to entry, and it's easy to find products to promote.
- **Amazon partners.** Many affiliate marketers have success with Amazon. There are literally millions of products to choose from, and it can be quite profitable. For more information, you can check out the [Amazon Associates Program](#).
